NUMBER 28

## Conscription For 16,000 Canadian Draftees

At noon Thursday the announcement was made that the Canadian Parliament in special session had passed a bill authorizing conscription of sufficient draftees to the Home Defence Forces to maintain the strength of the battalions overseas. General McNaughton, new Defence Minister had asked that the bill be passed.

This was what Col. Haiston had asked and was blankly refused and resigned because of it. Now ten days later Premier King has about faced and agreed to the passage of the bill just what King of a... goes on in Ottawa anyway? Or was there something deeper than conscription (even King and Easton)? Rumor said that resignations would follow the action of the bill regardless of how the vote went, so maybe there will be more big news from the nation's capital.

FIRST COUPONS IN RATION BOOK NO. 5 BECOME VALID NOV. 23

First coupons in ration book 5 to become valid, Thursday Nov. 23, are sugar coupons 46 and 47 and preserves coupons 33 and 34. C.G. McKee, regional superintendent of rationing for the Prices Board, announced. Also valid on Thursday are butter coupons 86 and 87.

Sugar coupons 44 and 45, and preserves coupons 31 and 32 in ration book 4 are currently valid.

Butter purchased with coupons 86 and 87 must last three weeks, until Dec. 14, Mr. McKee states. Low butter stocks during the season of short production have again necessitated dropping a week in the valid date of butter coupons. This saving in the butter ration of Canadian consumers is estimated at 50,000 lbs.

Butter coupons extend to managers of boarding houses, hotels and similar establishments, who may now collect only one butter coupon from each guest every two weeks, instead of two butter coupons every two weeks as formerly. Revised regulations now effective permit the manager of a hotel, boarding house, or similar establishment to collect from each guest every two weeks one sugar coupon, one preserves coupon and one butter coupon.

Nov. 30 is the expiry date of butter coupons 82, 83, 84 and 85. Canning sugar coupons F1 to F10 in Ration Book 3, and all other coupons in Ration Book 4, which do not expire, Nov. 30 become invalid on Dec. 31, Mr. McKee points out.

Emer on Fellowship and Palmer and several other boys of the R.C.A.F. are at home on a leave and just what the future holds the boys don't know. They expect to be assigned to other units of the armed services.

### ATTENTION! PIONEERS OF RAYMOND

WANTED: Information regarding events of interest in Raymond's early history such as the first school, the first church, teacher and pupils, the first church service, first Stampede, etc.

We are anxious to secure such information at an early date as our classes are compiling a First Settlers' Book and we don't want you left out. We are also having an Old Settlers' Party December 15 in the Opera House and need information which only you can give.

Please let us know who you are. Mrs. M. L. H. or Mrs. Hudson's class in Public School.

### GOOD HUNTING

Two groups of local hunters returned early this week from a trip to the mountain country north of Lethbridge where they went for big game.

In one party were Bruce and Garth Galbraith, Wallace Wilde, Boothie Card, C. A. Hudson and B. V. Heston. This party had fine luck each getting a buck deer and one elk amongst the party. The second group consisted of S. M. Sanford, Ted Meeks and Leonard Meheew. They brought back two bucks, Meeks and Sanford.

Leonard, we understand is going back again to get his.

The boys had a very successful hunt and they really made a beautiful sight.

### EDMONTON MAY GET HOUSES FROM ALASKA CAMPS

Edmonton, Nov. 22 (Press) — U. S. material and prefabricated houses from Dawson Creek, B. C., southern terminus of the Alaska highway, to relieve Edmonton's housing shortage was discussed at a meeting Tuesday between Arthur Arnold, regional housing administrator of the U. S. War Relocation Authority, and Brig. Gen. W. W. Trotter, special commissioner for Northwest Projects in Canada and Brig. Gen. F. J. Grogan, officer commanding of the U. S. Northwest Service Command.

Several hundred prefabricated buildings, including warehouses, a hospital unit and about 130 huts will be sent here if negotiations are completed satisfactorily. Mr. Arnold said about 400 families could be accommodated in these buildings when converted.

### NEWS NOTES

P. L. Egan, well-known insurance man, was in town the early part of his week checking up on a number of his clients and securing new business.

Alvin Jones was in court Monday at the funeral of his uncle John Jones, aged 71, who passed away there the Friday previous. Mr. Jones is a brother of H. A. Jones, recently deceased and Mrs. H. C. Phillips of Cardston has been an Alberta resident since 1912. He was married.

The children of P. J. Carlson saw a pioneer of Raymond gathered at the home of his son Leonard last week to honor him on his 86th birthday. "P.J." is still hearty and able to work, his feet being the only thing that bothers him at all. He was a fieldman in the early days of boot making in Alberta and has always been a booster for this industry. We extend our congratulations to him at this time.

Dr. Walker was the speaker at Rotary on Monday and spoke on the new drug "Penicillin." He traced some of the history of this wonder worker and the wonderful headlines that were being effected by it. In cases where before cases were slow, painful and sometimes disappointing, he had used this drug in a few cases in Montreal where he was working and it was being used in a limited way in Lethbridge now. It would not be obtainable except in emergency cases until after the war as great quantities of it were being used in army hospitals on all battle fronts. He answered several questions regarding its administration and in general. The talk was interesting and very greatly enjoyed.

## The Curtain Goes Down

The curtain is flung down today on the life of the great Canadian and the greatest of her own wealth Air Training Plan. For of us can conceive the size and scope of this plan and what it has meant to the Air Training Plan in the prosecution of the war. For of us can conceive the size and scope of this plan and what it has meant to the Air Training Plan in the prosecution of the war.

Started when the Luftwaffe was at its height, Canada was chosen to be the school of the future. Several reasons, one of the big ones being safety, also space for such a program. The contributing nations have poured men and money and materials into the British Commonwealth Air Training Plan and Canada has assisted with all her might. To keep it going and to keep them great plan. Thousands of British, American, New Zealand and Canadian boys have been residents of Canada that so many personnel of the

## Second Ward Mutual Fair Successful

R.C.A.F. have been in Canada since leave because there was no room for them in the advanced training centers. What an accomplishment. Who a lesson to the world of the possibilities of United action and planning.

And now the curtain comes to go down on the last act. Several are being closed, personal is being posted elsewhere, and as this program proceeds the Training Plan and its business will be but a memory. But Australia, New Zealand and England, and India, henceforth will be more than just a place on the map. Cupid has been busy during the years of the British Commonwealth's Air Training plan and thousands of Aussies and New Zealanders are taking home Canadian brides, just as Canadian are bringing brides from England and U.S. men their brides from the A.K.A. In the future Sydney or Melbourne will not be just places in Australia, but they will be where Alice and Tom, or Mary and Jack live, and where the grandchildren are growing up. They have become real to us because we have interests there. And so with

The 2nd Ward Mutual Fair and Dance Tuesday night was very successful and exceeded the expectations of the officers. The crowd was not as large as last year, but there were more and better things to see and people from their money and the 194 returns will be better and enough to just about send the 1945 fare to every 2nd Ward in the Area. Forces which was the aim of the evening. One party told us it cost 15c to get in and \$5.00 to get out.

There were booths of various kinds candy, quilts and what not to be drawn for, lunch counter, ditch market and various other things so that everybody found something of interest and enjoyed the evening and all present helped make it a success. The Mutual officers are very appreciative of the fine support given them in this enterprise.

the other nations where our men and women have been. A greater and broader understanding will result because of this intermingling of ideas, ideas and loves, and world travel will reach a peak never dreamed of before.

An one contemplates the possibility of this containing the thistles of better and older international understanding and good will, a business world, where cutthroat competition will cease and where our country will be interested in all its neighbors and the world will be dedicated to the peace, comfort and prosperity of all. If the British Commonwealth Air Training plan has a role for this accomplishment, let it with its contribution to the defeat of the Axis nations, true indeed will be the words as applied to the 10 Nations of this great plan "They bled for us, they bled for us."

### LIONS MEETING

The 2nd Ward Hall was the scene of another regular Lions meeting with Pres. Milt Ralph in the Chair.

"Oh Canada" was sung and prayer was offered by Lillian G. Shaw.

John Lee Melman was appointed Hall visitor for the evening in the absence of Herb Wilde.

Community singing was enjoyed by all present with Casey Veen at the Piano and Lou Tamer, Mr. McBride handling the organ.

An invitation was read from the Bow Island Club for the members to attend their Charter Night, and the Coleman Club also had an invitation to the club members to attend their Anniversary of Charter Night.

The District Governor or when Pres. Ralph that he would like to meet the club and the members thought it would be better that he visit the club on their Anniversary of Charter Night.

The C.O.S. meeting and that Lions night would be held on Monday Dec. 18th.

The meeting closed in the usual manner.

### HUNGARIAN SUPPER

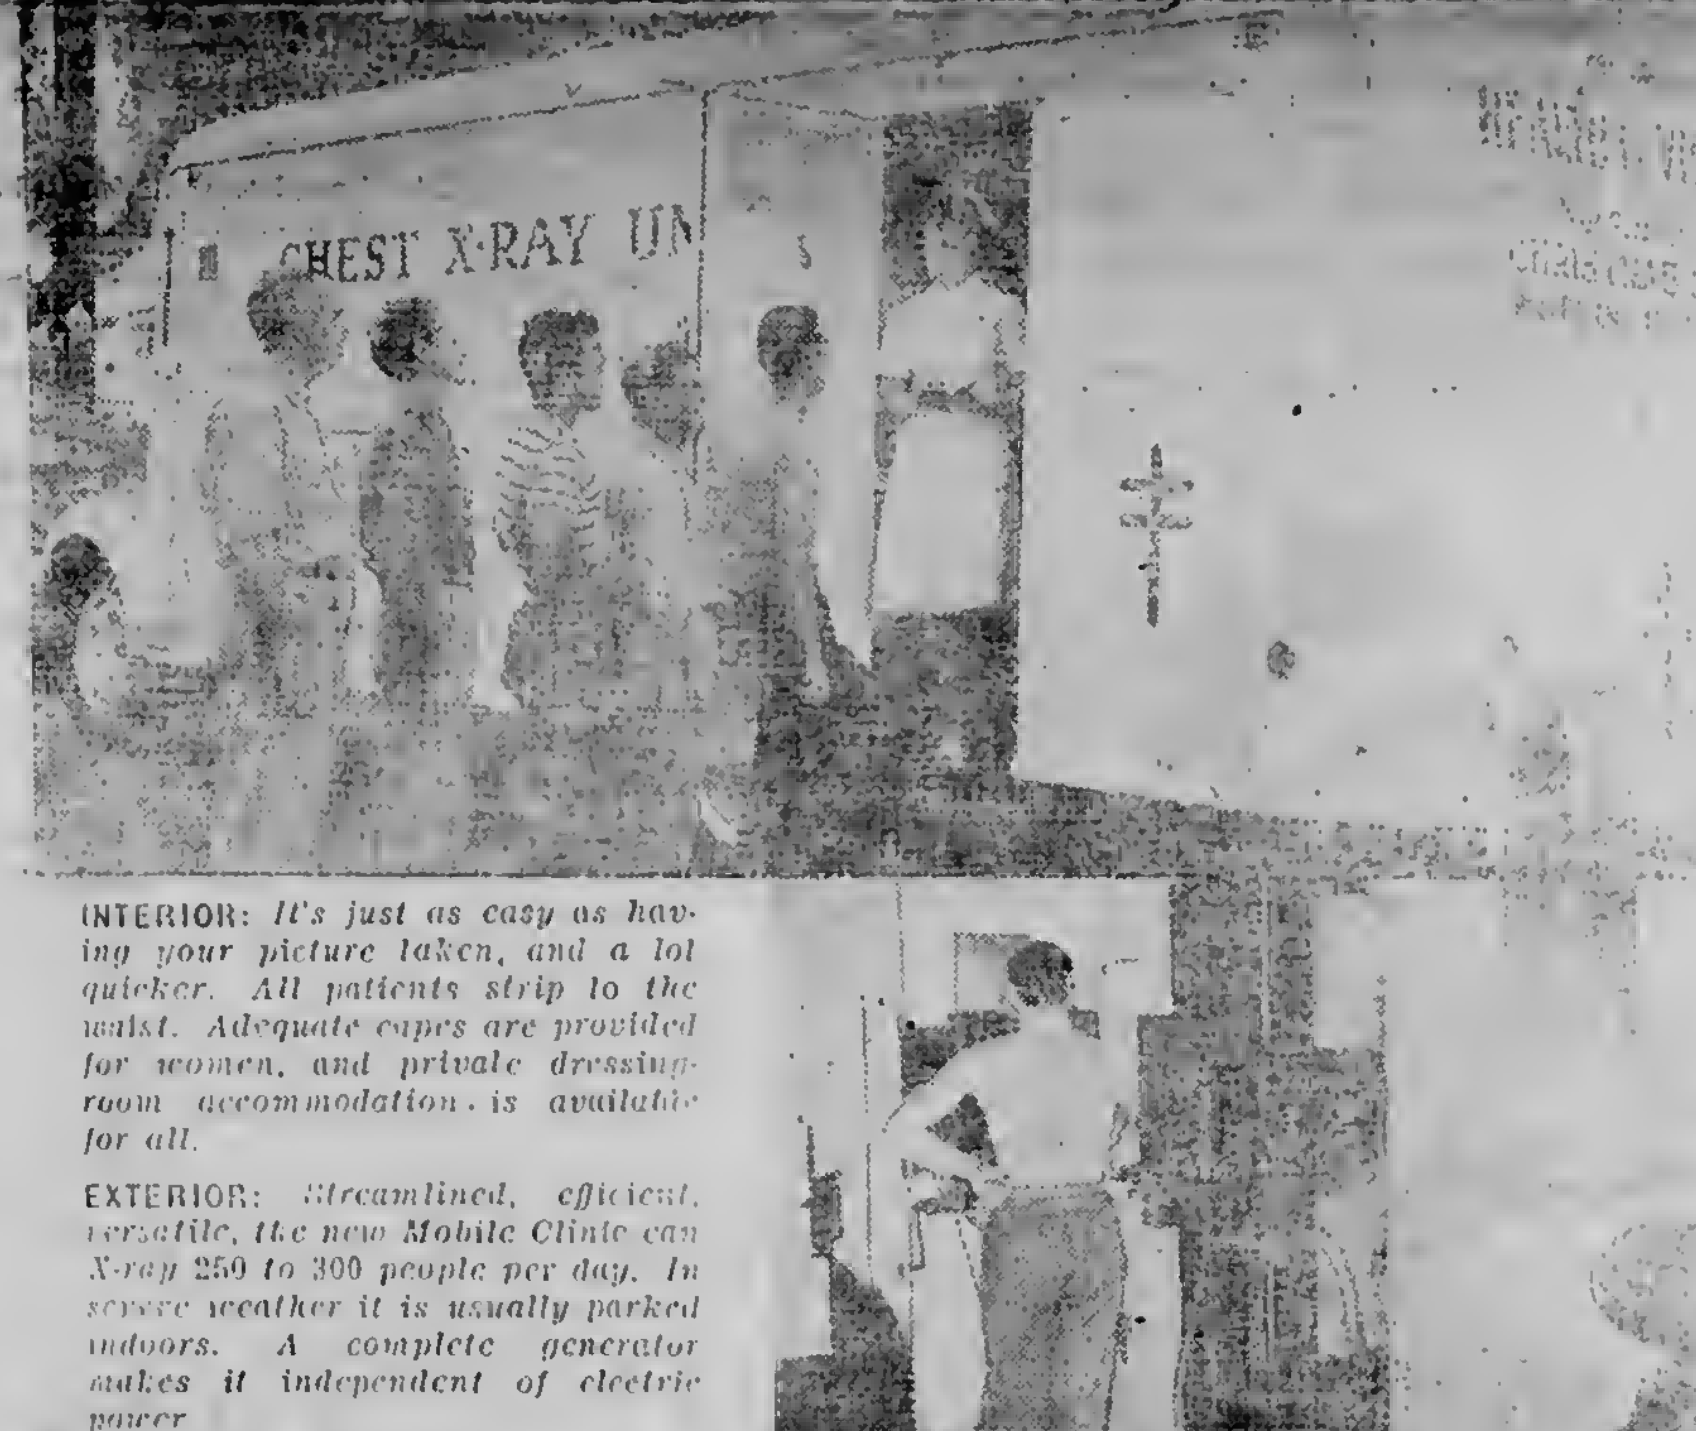

#### BENEFITS BODIES

A recent supper, held at the local Hungarian group, was a very successful and its earnings were used by this group to assist some of the local organizations in their welfare work.

The sum of \$140.50 was given to the Municipal Hospital to aid in their furnishing program. \$30.00 was turned over to the Red Cross for its work and \$30.00 to the Canadian Legion.

The organizations desire to express their thanks to the Hungarian people for their generosity and their timely assistance.

## NEW MOBILE X-RAY UNIT TO FIGHT

INTERIOR: It's just as easy as having your picture taken, and a lot quicker. All patients strip to the waist. Adequate cups are provided for women, and private dressing-room accommodation is available for all.

EXTERIOR: Streamlined, efficient, versatile, the new Mobile Clinic can X-ray 250 to 300 people per day. In severe weather it is usually parked indoors. A complete generator makes it independent of electric power.

**CHRISTMAS SEALS**  
**BUY \$25,000.00**  
**T.B. CLINIC**

Heavy artillery in the war against tuberculosis was delivered today to the Hon. Dr. W. W. Cross, Minister of Health, when the Alberta Tuberculosis Association turned over the second Mobile Chest X-ray Clinic, bought with Christmas Seal Funds.

Success of the first Mobile X-ray Unit was so remarkable in bringing to light early cases of tuberculosis that it was decided to enlarge and expand the Early Diagnosis Campaign by purchasing another Unit. The Alberta Department of Health, in one year's operation of the first Unit, has X-rayed nearly 60,000 Albertans, to discover about 100 cases of active tuberculosis, most of them in the early stages, when recovery is almost certain. The first Unit cost \$15,000.00. The new Unit is valued at \$25,000.00, and represents the very last word in mechanical and scientific achievement.

Unit No. 2 is contained in a bus body, built jointly by General Motors Ltd. and the Victor X-ray

Corporation. It has a higher clearance than Unit No. 1, so that it can negotiate more difficult roads, and it hauls with it a trailer containing a complete generating plant, allowing it to operate anywhere in the province, providing its own power where necessary.

Dr. Cross said, "We are grateful to the Alberta Tuberculosis Association and its affiliated Christmas Seal Committees for their assistance. The solution to the problem of tuberculosis seems to lie in the early stages, and the only way to do this is to X-ray large groups of apparently healthy people."

Rotary Clubs and Kiwanis Clubs in Alberta have made Christmas Seals and anti-tuberculosis work their major community services. Committees are situated in Banff, Calgary, Carleton Place, Edmonton, High River, Lethbridge, Medicine Hat and Red Deer.

Christmas Seals provide the only source of revenue for the local committees and also for the Alberta

Tuberculosis Association, which operates closely with the Department of Health and with the tuberculosis division, whose chief is Dr. A. H. Baker, Superintendent of the Central Alberta Health Service, Calgary.

Dr. Baker said that tuberculosis is to get control of all prevalent tuberculosis. Approximately 100,000 out of every thousand people and well persons have active tuberculosis. A large proportion of these are infecting others with their breath. The more spread we find, the sooner we can bring under control this oldest scourge of mankind.

The Alberta Tuberculosis Association is affiliated with the Canadian Tuberculosis Association and the National Association of the T.B. Its activities embrace all phases of tuberculosis work in Alberta. The X-ray survey is one of the most important. It also sponsors anti-tuberculosis hospitals in Canada and Edmonton, where patients are taught to make good use of their bodies.

Vocational education, a feature of the X-ray survey, is also being carried out. It is hoped that they will not only be able to control tuberculosis, but also to control the spread of the disease.

### EMPLOYEES FOR XMAS RUSH

The hiring of extra workers by retail stores and the Post Office Department for the Christmas rush season has been simplified by a special Order signed by Hon. Humphrey Mitchell, Minister of Labour, under National Selective Service Civilian Regulations. It was announced today by A. MacNamara, Director of National Selective Service.

From December 13 to January 5 of 1945, retail businesses may engage Memberships in the Alberta unit without first securing National Selective Service permission—students incepted \$2,99,376.37.

and teachers on Christmas vacation, any woman, and any man who has passed his fifty-ninth birthday.

The Post Office Department may employ persons in the same category without permit from December 1, 1944, to January 10, 1945.

If the employer—either a retail business or the Post Office Department—wishes to retain a temporary employee beyond the exemption period, it will be necessary to secure a Selective Service permit.

Mr. MacNamara pointed out that in relaxing the regulations to ease the Christmas rush, it is necessary to still maintain employment controls in general for the protection of essential industries.

### CREDIT UNION INFORMATION

Total assets of some 145 Alberta credit unions as at September of this year reached \$824,159.53, an increase of \$26,760.97 over the month of August.

Memberships in the Alberta unit without first securing National Selective Service permission—students incepted \$2,99,376.37.

#### BREEDING AND DEVELOPING FORAGE CROPS

New and improved forage plants for hay and pasture production are continually being developed in an attempt to meet the needs of a changing agriculture. Nature is forever changing and as a result new problems frequently develop. Bacterial wilt of alfalfa for instance is gradually increasing as a weed resistant strain of alfalfa will be needed urgently in the near future.

In setting out to improve a crop plant a survey of all available material must be made. Virtually hundreds of species are planted in introduction nurseries. In these nurseries are grown plants that have been selected and introduced from all parts of the globe. They are observed, and their general characteristics studied such as prospective yield, hardness, disease resistance, drought resistance, longevity etc. It is seldom that more than four or five promising species can be chosen out of the mass of introduction material. These promising selections are then grown in plots where the undesirable types are rogued out. Little by little a desirable strain is developed but it takes a long time, often five to ten years.

When a strain has been selected down ultimately to where it is reasonably uniform it must still be tested in plots to compare its yielding capacity in comparison to standard crops. This alone requires three years. Naturally it requires several years after a plant first makes its appearance until its improved progeny makes its appearance with seed growers for general distribution.

Breeding work really takes even more time. The plant breeder must have a clear conception of the result he is attempting to obtain before he proceeds. He must make a thorough survey of material required and study the characteristics and qualities of each in detail.

When this has been done he may find that he can cross two species or varieties in hopes that the desirable qualities of both parents be combined in the hybrid. It may take many crosses before a promising combination is obtained. The selected hybrids are then tested individually. In the first generation the progeny will be uniform, that is, all plants will be similar. However, in the second generation all characteristics contrasted in the parents will be shuffled at random, so that a variety of types are produced. It actually requires several generations of systematic selection to reduce the hybrid population, as it is called, to a uniform type.

When this has been ultimately accomplished the variety must be tested against standard crops to prove its merit. Even after this has been completed another two or three years must necessarily elapse, before the seed supply has been increased to where it is available to the public.

#### MORE MILK REQUIRED

Every effort should be made to increase the production of milk this winter. The large order for cheese and concentrated milk products to Britain is still unfilled, and there is about nine million pounds less butter in storage than there was a year ago. The consumption of butter in Canada will exceed production every

## FLYING COMMENTATOR

Cpl. DON FAIRBAIN, of the R.C.A.F., interviews a Spitfire pilot on a broadcast to CBC's listeners, back home. Formerly the Ontario regional commentator for CBC's Farm, Broadcast Dept., Fairbairn joined the airforce in the Spring of 1942. Since then he has continued to contribute his farming and radio interests in discerning accounts, broad cast to Canada, of agricultural conditions in Europe both before and after the invasion. In addition to talks he has given from the battle fronts, Fairbairn was heard recently over CBC in an out the spot description of a Gestapo dungeon in Belgium.

THE fight against V.D.  
is a family affair...

A laughing couple, dodging showers of rice... fireside... garden... chubby babies...

These are scenes we know and like, because they're part of our lives... because they spell happiness... contentment.

But we know that these things don't "just happen." They have to be worked for, lived for. Protected, too, because of ever-present dangers which may spoil them.

Venereal Disease is a spoiler. In a cold, relentless way it can kill infants, rob the home of its breadwinner, cripple, destroy. These are not mere possibilities. THEY HAPPEN... RIGHT HERE IN CANADA!

But, these things should never happen. They can be prevented.

Young men and women can safeguard their future happiness together by making sure before marriage that V.D. will not blight their plans. A medical examination, including a blood test for syphilis, is a protection no couple can afford to pass up.

The expectant mother, too, may know for sure that her baby will be all she dreamed of. Syphilis in the expectant mother rarely shows outward signs, and it is no respecter of persons. An early check-up by her doctor, including a blood test, is a most essential, yet simple, first step in protecting her baby's health.

Nor must the breadwinner neglect his part. The security of the home depends upon his ability to work regularly and efficiently. Unsuspected syphilis, striking in middle life, may make the head of the home unable to provide for his family. It is wise to KNOW FOR SURE in time. Industrial medical examinations should include a routine confidential blood test.

A blood test should not be looked upon as something unusual. It should be regarded for what it is... a normal safeguard of health, security and happiness.

Invest a few minutes of your time in ASSURANCE.

### FIGHT VD ON THE DOMESTIC FRONT

## These dimes work their heads off

No doubt you've seen dimes worn so thin that you can't see the heads on them.

That's what happens when money is really passed around.

That's what happens every year to at least two and a half billion dimes that are put into circulation through the life insurance companies. These dimes really go to work.

They come in the form of premium payments from four million policyholders and if you prefer figuring in folding money, they amount to 250 million dollars.

In peacetime these dimes are not idle. They are kept busy through investment in a great variety of local and national undertakings. For the past five years they have been busy in a strictly military sense—backing up our fighting men with more than a billion dollars' worth of Victory Bonds.

These busy dimes are helping to buy security for you and yours—both in the present and in the future—both at home and abroad.

"No, thanks," he replied, retreating hastily, "I married something like that."

about the things you buy in wartime

## The KIDS

ARE CERTAINLY

## TOUGH ON SHOES!

1,300,000 MORE PAIRS  
OF CHILDREN'S SHOES LAST YEAR

In the last twelve months Canadian manufacturers made for Canadian children about 25% more shoes than in 1939—a fine job—done by the organization and direction of production by this Board's Footwear Administration and the co-operation of manufacturers. And this was accomplished while they were making more essential type shoes for war workers, who wear out their shoes faster than they do in their normal employment.

## THE DISAPPEARING ACT OF RUBBER-SOLE SHOES

In normal times most young Canadians got at least one pair of rubber-soled, canvas-top shoes a year. But natural rubber supplies fell into enemy hands, and the manufacture of rubber footwear was drastically curtailed. We're now using reclaimed and synthetic rubber in these shoes, there have been more of them this year and there will be more next year. Leather-soled shoes have had to be used in place of this rubber-soled footwear but shoes made of leather need more care than running shoes. When they don't get it they wear out more quickly; when they get it they must be dried slowly, away from direct heat—and they should be greased also. It's not always a case of poor quality; it's poor care.

## LEATHER GOES TO WAR

You've got to have good strong leather for children's shoes, but the soldiers are taking most of ours for their boots. For these leathers, a substantial portion of the hides came from South America and other countries. War cut down these imports and there have been difficulties in getting enough of these and our own hides tanned into leather due to shortage of workers. The production of high grade leather shoes has, however, been maintained at the highest level consistent with the labour and materials available. While shoe factories have been working overtime, factory capacity for civilian shoes cannot be expanded in wartime and it's not possible to change plants from the manufacture of one type of shoe to another—for instance, from women's to children's. The processes, the machines and the lasts are different.

## TURNING HIDES INTO SHOES

There are very large war uses of leather—for instance, in footwear. A soldier requires four pairs of shoes in the first year of his service and about three pairs per year thereafter. But, what is more important, he needs to have his shoes re-soled four or five times a year. His

shoes are of the highest quality leathers obtainable, leaving the other grades of leather for civilian use. Airmen need leather for jackets and mitts. War factories need leather for belting and farmers need leather for harness. Leather—the best leathers—has gone to war.

7TH LOAN HITS RECORD  
\$1,500,079,600 TOTAL

Ottawa, Nov. 18 — The National War Finance Committee announced subscriptions in Canada's 7th Victory Loan campaign have reached an all-time high of \$1,500,079,600.

The new total for the 7th Victory Loan, which had a minimum objective of \$1,300,000,000, is \$112,000,000 more than was reported at the corresponding period of the Sixth Loan.

Purchases by individuals now stand at \$750,076,950, representing an increase of \$120,000,000 over the total at the same date in the Sixth Loan. The payroll savings canvass accounted for \$223,000,000, and general canvass produced \$527,000,000. Purchases by large buyers, including corporations, now stand at \$750,002,650.

Returns show that more individuals purchased in this loan than ever before. To date 3,179,700 applications have been received, an increase of 233,762 over the Sixth Victory Loan.

One of the outstanding features of the loan is the participation by the armed forces with figures now

### CARD OF THANKS

Mrs. William Redd and family wish to express their deep appreciation to all who assisted them so generously and sincerely during their recent bereavement.

### CARD OF THANKS

We desire to express our appreciation to all who so kindly assisted us during our recent bereavement. For the flowers, the cards and everything that was done we are most grateful.

Mrs. Katie Nemedi, Helen & Irene.

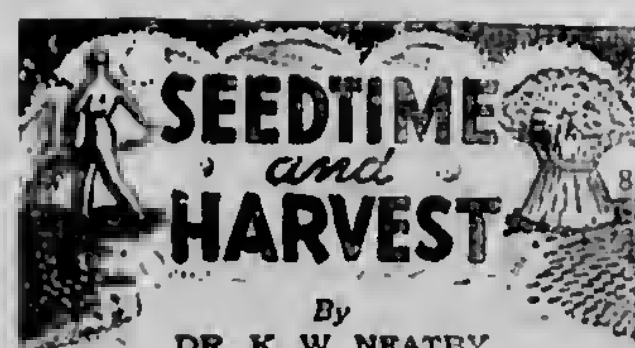

### NEWS NOTES

P. D. Bell, of Beany's Steak Shop in Lethbridge was a visitor in town Thursday.

Schools commenced the 9:30 a.m. opening on Monday of this week and the change has shortened the lunch hour of the students to 1:10 minutes.

Last Sunday evening was Home Missionary night and visitors were present in both Raymond wards as per appointment.

The Ellis Heninger family met at the home here Sunday night in a surprise party for their father. A large number of neighbors and friends from Magrath where the family lived so many years, were present and all present enjoyed a very fine evening.

### Oats and Barley

Twenty-two different varieties of oats appeared among samples sent in to our laboratory, last year, for germination tests. Only eight were included in lists of recommended varieties. They are: Ajax, Banner, Eagle, Exeter, Laurel (hulls), Legacy, Vanguard and Victory. However, these figures do not provide a true picture, because only 53 per cent of the total samples received were of non-recommended varieties. In other words, judging from the material which passed through our laboratory, 51.7% of the oats in the Prairie Provinces, in 1944, grew from seed of recommended varieties.

The situation with respect to barley is similar, but not quite so good. Seventeen different varieties were included in samples we tested for germination; but only eleven are officially recommended. OAC 21, Mensury Ottawa 60 and Olli are recommended, in specified areas, for malting purposes; while Plush, Wisconsin 38, Sanalta, Rex, Prospect, Newal, Regal and Trebi are considered suitable feed varieties. Of the feed varieties, all except Trebi are smooth awned. 88.8% of the samples received were derived from recommended varieties. Some varieties are suited to some areas and others to others. Detailed recommendations may be obtained from Dominion Experimental Farms, Provincial Departments of Agriculture, Universities or Line Elevators Farm Service.

Line Elevator agents are authorized distributors of seed grain for Crop Improvement Associations in Manitoba and Alberta, and for the Seed Growers' Association in Saskatchewan. Farmers are invited to consult them about germination tests and seed supplies.
